- Proficient in TestNG and annotations.*
- Worked on converting manual test cases into Selenium automation test cases.*
- Good knowledge of API testing using the POSTMAN tool.*
- Experience in defect management using JIRA.*
- Proficient in Java Basics and OOPS concepts*

Areas of manual testing involvement -

- Good knowledge of the Software Development Life Cycle (SDLC).*
- Strong understanding of the Software Testing Life Cycle (STLC).*
- Experience working in an Agile environment.*
- Actively participated in all Agile ceremonies, including sprint planning, daily standups, sprint reviews, retrospectives, and backlog refinement.*
- Attended scrum meetings to discuss daily project progress and updates.*
- Knowledgeable in test design techniques like Equivalence Class Partitioning and Boundary Value Analysis.*
- Experienced in analyzing user stories in the Sprint Backlog.*
- Expertise in the Bug Life Cycle.*
- Involved in various types of testing, such as Functional Testing, Regression Testing, and Sanity Testing.*
- Responsible for designing and executing test cases and generating the corresponding test reports.*
- Skilled in creating and enhancing manual test cases according to requirements provided or updated by the Product Owner.*
- Generated comprehensive Test Summary Reports.*

EXPERIENCE

Kapittx (developed at Kach Tech Pvt. Ltd)

Apr 2022 - Present

Quality Assurance Analyst

Domain: FinTech

Clients: Sify Technology, Link In Time, Blue Dart, Worldline, etc.

Kapittx is an automated SaaS platform designed for managing Accounts Receivable and B2B payments. It helps Finance, Operations teams, and Account Managers collect payments faster and more efficiently. By automating repetitive tasks like updating spreadsheets, handling invoice disputes, and reconciling invoices, Kapittx reduces delays in payments. This boosts revenue assurance, cash flow planning, and finance productivity.

Responsibilities

- Understood the business requirements of the customer.
- Engaged in requirement analysis, design, and creation of test cases.
- Reviewed test cases and documentation for accuracy and completeness.
- Designed and executed test cases according to functional specifications.
- Conducted functionality testing, retesting, and regression testing.
- Conducted sanity testing to ensure system stability after updates.
- Performed regression testing to confirm existing functionalities remained intact.
- Developed automation test scripts using Selenium WebDriver with Java, TestNG & BDD framework.
- Enhanced and maintained the existing automation framework.
- Executed system test suite.
- Managed defect tracking and reporting processes effectively.
- Logged defects in JIRA.
- Compiled and prepared test reports summarizing testing activities.
- Participated in daily status meetings with the testing team and weekly meetings with the Manager to ensure alignment on project progress and objectives.
- Handled customer interactions by understanding their issues, providing solutions, and ensuring timely resolution
- Developed and maintained automation test scripts using Selenium WebDriver, Java, TestNG, and Cucumber (BDD framework).
- Performed cross-browser testing (Chrome, Edge, Firefox) and mobile testing (iOS, Android).
- Conducted API testing using Postman and automated API tests with REST Assured.
- Created and maintained load tests using JMeter and Gatling.
- Handled web accessibility testing and ensured compliance with accessibility standards.
- Utilized product tracking tools like JIRA for defect management and reporting.
- Integrated automated tests with CI/CD pipelines using Jenkins & GoCD.
- Worked with Cloud-based infrastructure for testing applications hosted on AWS.

Education

EDUCATION

Maharashtra State Board Of Technical Education

Diploma

Savitribai Phule Pune University, Pune

Bachelor of Engineering

SKILLS

Selenium, Core Java, TestNG, BDD Framework, Maven, Postman, GIT, JIRA, SQL, Microsoft Excel, Automation Testing, Manual Testing .

TECHNICAL EXPERTISE

- Automation Tools: Selenium, TestNG, Maven, GIT
- Programming: Core Java
- Bug Tracking Tool: JIRA
- Databases: SQL, Oracle
- API Testing: Postman
- Tools: Microsoft Excel
- Load Testing: JMeter, Gatling
- CI/CD Tools: Jenkins, GoCD
- Cloud Technologies: AWS, Azure
- Operating Systems: Windows, macOS, Linux
